

Transparentverbände

Features & Benefits

- Intended for woundcare applications, securing objects to the skin such as catheters, and as a secondary dressing
- Adhesion securely holds the catheters and other devices in place while gentle on the skin
- Used to protect wound site from possible bacterial and viral infection
- Breathable to ensure proper moisture content in the wound bed
- Clear dressing allows for wound visualization
- Offered in a variety of popular sizes
- Flexible and conform to body contours to provide less stress to the patient's skin during movement
- Can be worn longer than tape and gauze dressings leading to less dressing changes
- Single-Use and Latex-Free
- Hypoallergenic
- Available Sterile or Non-Sterile for kit applications
